

****** PRESS RELEASE ******
November 1, 2009

Fair Oaks (Sacramento), California

The Parker Group announces the merging of their practice with Benefit Technologies, LLC (BT) a national benefits company which serves nearly one million employee lives. Kevin Spann, President, comments, "This marks an exciting time for us. Becoming a wholly owned division of Benefit Technologies will enable us to continue our journey in building our agency practice to an entirely new level. Now we will enjoy the privileges and strengths of tapping into Benefit Technologies growing nationwide network."

Our association with Benefits Technologies gives us substantially more resources, enabling us to have a more focused concentration on the delivery of employee benefits than was previously possible. The merger brings a wealth of new and enhanced services to existing clients and distribution partners including:

- ✓ Proprietary Technology Solutions emphasizing Web-Based Co-Browsing Services for all benefit enrollments (easily integrated into benefit enrollment self service platforms)
- ✓ A national footprint service center support with the ability to scale to high capacity. Supporting locations include, Sapulpa, OK, Jacksonville, FL (four locations), Boca Raton, FL, Winter Park, FL, Sarasota, FL, King of Prussia, PA, San Diego, CA, and Royal Oak, MI.
- ✓ Best in class implementation and account management support

We will continue to focus on the sales, general agent service, and marketing of supplemental benefits, employee communications, consolidated billing, and other related services that may benefit our client base. We will now operate under the branding of Benefits Technologies and operate as Benefits Technologies Division XI, LLC, a subsidiary of BT. In the near future, all correspondence including email addresses and other relevant communication, will change to reflect the new corporate brand.
